SUMMARY

A Full-stack developer with experience building end-to-end web applications and Comfortable owning products from idea to deployment, integrating APIs, designing clean UIs, and optimizing performance. Actively building and experimenting with LLM-powered features and backend integrations for real-world workflows.

SKILLS

Technologies & Tools: Front-End Web Development, Database Management Systems

Languages: Python, HTML & CSS, JavaScript ,PostgreSQL , React, Next.js, FastAPI

EDUCATION

B.Tech- Information Technology Panimalar Institute of Technology, Chennai	8.51 (CGPA)	<i>Oct 2020 - Jul 2024</i>
HSC, Ideal Hr sec school	78.8%	<i>Jul 2018 - Apr 2020</i>

WORK EXPERIENCE

Software Developer

Quantum Dive JAN 2025 - DEC 2025

- Developed a React-based front end application integrated with blockchain technologies to analyze **Cryptocurrency** tokens.
- Designed and implemented UI components that presented **Real-time token** analytics.
- Helped users to understand token trends and value through visual reports on utility,**trading-volume**,and historical behavior.
- Built and integrated backend APIs using **FastAPI**, improving data handling and performance by **40% for real-time** cryptocurrency analytics.
- Built a pipeline that aggregated project outputs into structured text files, applying formatting and chunking **strategies to optimize LLM** comprehension.
- Produced **structured representations** suitable for downstream visualization as mind maps or knowledge graphs.
- Deployed backend services on **AWS**, leveraging **EC2** for scalable API hosting.
- Containerized a Python backend application using **Docker** and orchestrated **Redis** and **database** services with Docker Compose for seamless inter-service communication.
